FOR HAWKE'S BAY CONTRACTORS

The Paperwork-Free Fortnight.

Pick the paperwork job you hate most. Show us once. Two weeks later it runs on its own, checked against your real dockets, and your team knows how to use it.

Sound familiar?

- Docket photos and paper sheets typed up every morning.
- Invoices going out a week after the job finished.
- Fuel, road user charge and supplier emails entered by hand.
- Running the business all day, then doing its admin at night.

What you get

1. **A free 30-minute session**
   Show us the process once, in Napier, Hastings or by video. You get a straight answer on whether it's worth doing.
2. **One process, automated**
   Like docket photos into the job sheet, finished jobs into draft Xero invoices, or fuel and RUC emails logged per truck.
3. **Built on your real paperwork**
   Tested on a week of your actual dockets and emails, running alongside your old way at first.
4. **A short list of anything odd**
   Anything unclear goes to a person to check. Nothing involving money goes through unapproved.
5. **A 30-minute crew session**
   On site or by video, so the people doing the paperwork know what changes.
6. **30 days of tweaks included**
   Real paperwork throws up surprises. We adjust it as they come up.

Our promise: 3 hours a week, or we keep working.

If it doesn't save you at least 3 hours a week within 30 days of going live, we keep working on it at no extra cost until it does. Fixed price agreed before we start. Works with Xero and the tools you already use.

3 setups a month

DAYS 1–2
Free session, fixed price, access and a week of sample paperwork.

DAYS 3–10
Built and tested on your real dockets, emails and Xero.

DAYS 11–14
Runs alongside the old way, crew session, then the old way stops.

We've done this at fleet scale. We built and run CartageCore for a Hawke's Bay transport and aggregates company: dockets, fuel and road user charges arrive and get logged without anyone typing, and invoices go to Xero straight from the job.

Book before Christmas. It's running before the February rush.
